

## Interested in an easy way to podcast?

Nestled inside the former WW II Telephone Exchange building (Building 9059), lives a group called Computer Deconstruction.

Our purpose is to teach computer technology and the changes that have been made over the past 15+ years. As part of the teaching experience, we support a portion of the network, servers, and desktop computers used at InfoAge.

Projects have included dedicated servers for the security cameras, specialized computer workstations to support the TLM-18 antenna, and the broadcast automation for the podcast studio.

In the spring of 2017, discussion began between the CDL volunteers on branching out into the podcast realm. That concept integrated with the reconfiguration of a portion of the CDL space to support a podcasting studio.

Our facilities feature a four person with state-of-the-art recording and mixing equipment and a classroom space for audio producers. The studio is equipped with professional recording and sound equipment. Audio-editing tools like Audacity and Hindenburg are also available.

Producers are welcome to bring an engineer or self-operate the controls

Interested in live streaming? Call in shows? We can help with that as well.

Computer Deconstruction Lab at InfoAge  
Building 9059  
2201 Marconi Road  
Wall Township, NJ 07719-4081  
+01 732-456-5001

**Audio Chain:**

- Four Electro-Voice RE320 Microphones / EV309 shock mounts on Heil Booms
- Four DBX 286s pre-amps
- Mackie CR1604 mixer
- Four Sennheiser HD 280 PRO headphones
- Behringer HA8000 8-Channel Headphone Amp
- Telos Z/IP Streaming appliance
- HP Z800 Digital Audio Workstation running Ardour, Audacity, and Hindenburg Broadcaster. Input is via an ASI 5640 4 channel audio card
- Telos Two X 12 Broadcast phone system
- Cisco SPA800 ATA to feed analog lines to the phone system
- Rivendale Broadcast Automation with touchscreen controllers
- Support for a remote host or guest via Skype

**Recording:**

We support Ardour, Audacity, and Hindenburg Broadcaster so you don't waste time learning new software.
